

Meets ANSI/ESD S20.20 and Packaging standard ANSI/ESD S541

## FEATURES

- Provides physical protection with conductive material providing a reliable path-to-ground
- One piece design includes a steel wire frame for extra strength
- No tooling costs
- Easy assembly without the need for tape, glue, or staples
- Ships flat, knocked down; perfect for returnable packaging solutions
- Available with optional lid, ESD handles, or permanently static dissipative bottom foam pad for cushioning
- Made in the United State of America

## MATERIAL SPECIFICATIONS

| Properties             | Typical Value                             |
|------------------------|---|
| Resin Type:            | Polypropylene                             |
| Conductive:            | Inherently                                |
| Surface Resistance:    | $1 \times 10^2$ to $< 1 \times 10^5$ ohms |
| Humidity Independent:  | Yes                                       |
| Temperature Tolerance: | -17° F to +230° F                         |
| Melting Point:         | 324° F                                    |

Per Packaging standard ANSI/ESD S541 section 6.1 Inside an ESD Protected Area "Packaging used within an EPA (that satisfies the minimum requirements of ANSI/ESD S20.20) shall be:

1. Low charge generation.
2. Dissipative or conductive materials for intimate contact."
