

SynTRAC™ PLM

Embedded Cellular Modem

4G LTE Cat M1 / 4G LTE Cat NB1/2G

SynTRAC™ PLM is a multi-region 4G LTE Cat M1, 4G LTE Cat NB1, global 2G communications platform. It features multi-GNSS satellite navigation technology, supporting in parallel GPS, GLONASS, Galileo, BeiDou, as well as QZSS. SynTRAC™ PLM utilizes a USB interface to easily connect to all types of environments, from a sensor end point to an operating system, making integration simple. This device is ideal for applications that are transitioning to LTE from 2G and 3G, due to the long-term availability and scalability of LTE networks. At the same time in areas with marginal LTE coverage, they can provide 2G fallback.

ABOUT THE SynTRAC™PLx SERIES

SynTRAC™ PLM is a member of the SynTRAC™PLx family of embedded cellular modem's which enable solutions providers, OEMs and others to harness the potential of the Internet of Things, making their products connected end devices. More than just a modem, the PLx family of devices are complete, fully featured, pre-certified edge devices, with cellular connectivity, GNSS/GPS receivers and fully-integrated antenna systems. The PLx family of products support a wide range of applications, including tracking, location data, connectivity for sensors, digital signage, instrumentation and other applications that require wireless connectivity. With an integrated IP stack, the module is designed to support a wide range of data-centric applications. The unique combination of performance, flexibility, and global coverage make the module ideally suited for M2M applications, such as a cellular modem, smart energy gateways, remote access video cameras, digital signage, telehealth and telematics. When power saving mode is enabled, it reduces energy consumption and allows battery-powered modules a longer operation time.

MARKET APPLICATIONS

- Cellular modem
- Transport & Telematics
- Smart manufacturing & industrial IoT
- Smart buildings/cities
- Smart energy & utilities
- Retail

FEATURES

- Small form-factor with integrated antenna
- Multi-GNSS satellite navigation technology: GPS, GLONASS, Galileo, Beidou, QZSS.
- Connectivity via USB
- Modem FOTA

BENEFITS

- FCC & ISED Certified
- Reduced time to market.
- Power saving algorithms
- AT commands
- FreeRTOS coming soon
- Can be used as a low-cost evaluation platform.
