

Digital Gas Sensor Developer Kit

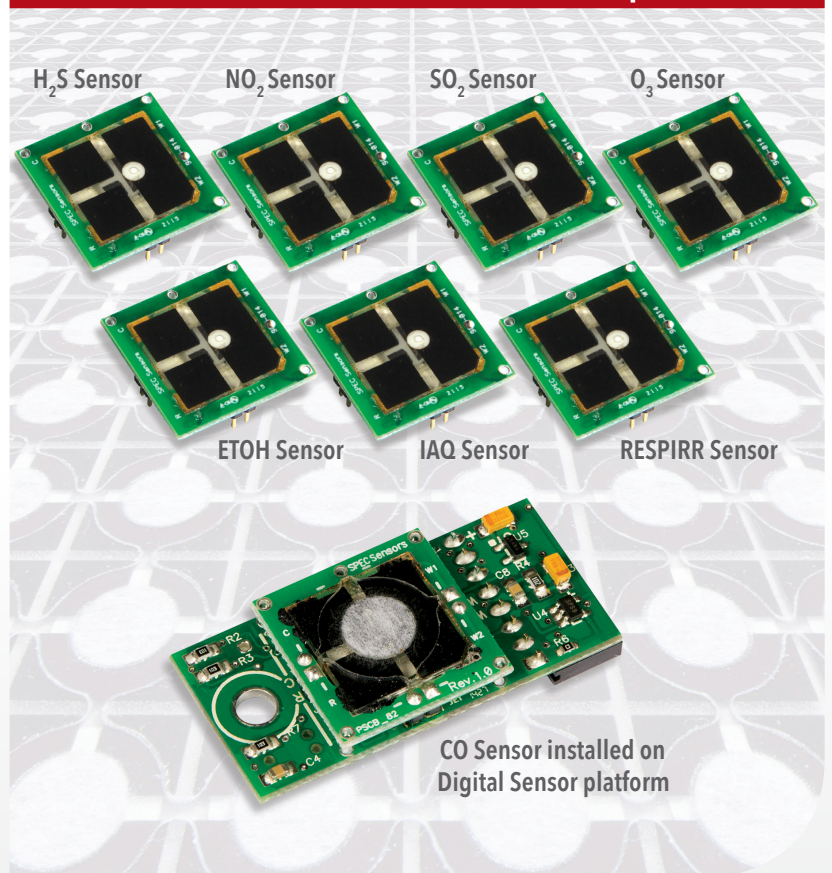

Easily add any SPEC Sensor™ to your design with our Open-Source Digital Gas Sensor Developer Kit.

You get:

- The Digital Gas Sensor platform with the CO Sensor
- A sample of each different SPEC Sensor on a pinned PCB for simple exchange with the CO sensor
- Directions on how to easily modify the settings to support our different sensors
- The Schematic, Parts List and Gerber/Design File so you can replicate all or part of our design
- An Open-Source License to use on your SPEC Sensors based design

Gas	Range	Resolution
CO	400 ppm	600 ppb
H ₂ S	10 ppm	15 ppb
NO ₂	20 ppm	100 ppb
SO ₂	20 ppm	100 ppb
O ₃	20 ppm	150 ppb
ETOH	800 ppm	1000 ppb
IAQ	400 ppm (CO equivalent)	600 ppb
RESPIRR	20 ppm (NO ₂ equivalent)	100 ppb

Sensors included in Developer Kit
